THE STORY

We know a certain wine that we don't talk about in WA (starts with Pinot, ends with noir), is the ultimate food wine - but a close rival, and maybe just as good is Cabernet Franc. We have a great site for Franc at our Wautoma Springs vineyard where it produces a rich, complex wine with blue fruit and herb notes - and way less 'green' notes than other versions. Incredibly food friendly, medium bodied with a brilliant blend of tannins and acid. We thought 'food' when we were thinking of the label and thought of those meals where you find yourself digging in with a fork and spoon to get every last bite.
